

FLPT 101 Product Training

FLPT 101, Product training is normally about 4 to 5 hours. All product training covers the following

- Product - how to use the instrument, do's and don'ts
- Programs - access and explanation
- File saving including upload and download of files

How to perform various types of alignments with the system

- Vertical Alignment
- Horizontal Alignment
- How to perform soft check
- Off set for thermal growth
- Machine train - Multiple coupling alignments (System dependent)
- Target values
- Sensor values
- Machine defined data
- Text editor
- Repeatability test
- Sensors and technical aspects of entire system

Candidates will have the opportunity to use the instrument in the classroom and practice what they have learnt.

Certificates included.
